| Why this candidate should be elected to the position | I really believe in the mission of AFE and fully support the goals of becoming the premier organization for all facilities/maintenance/operations professionals. We are a group of professionals who have largely gone unnoticed except when something goes wrong in our facility. I'd like to see that change. In restarting Chapter 6, I've been active in setting up each meeting and attending as many functions/trade shows as possible to build the membership. I even wrote to all members of AFE in my home state (not in Region I) encouraging them to start a local chapter. Region I should be one of the most active regions due to population density and number of facilities of all types. We will strive to make that happen. |
