Dear Chapter 74 Members and Guests,

The 2012 season brings an excellent variety of tours; from metal forging and railroad yards to water filtration plants and data centers. Technical presentations will cover sustainability, boilers and networking tools. Don't forget our 11th Annual Golf Tournament at Stow Acres.

Our monthly chapter meetings and events offer great networking, interesting tours and technical information that you can bring back to your facility and put to use right away. We look forward to seeing you all at the upcoming meetings this year where we can learn, lead and influence the facilities engineering profession.

Tom Wall, Chapter 74 President

2011 Chapter of the Year
